Farm / Ranch Wildfire Plan Workbook

Preparing for and Responding to Wildfire

This workbook is adapted from the Government of British Columbia, Investment Agriculture Foundation of BC, and their contributors.

This resource is intended as a guide and as such the County of Northern Lights and their council, employees, or contractors will not be liable for any claims, damages, or losses of any kind whatsoever arising out of the use of, or reliance upon, this information.

Contents

Part A: Before a Wildfire	1
1. Wildfire Threat	1
2. Agriculture Operation Information	1
3. Range Tenure Information	2
4. Emergency Contacts	2
5. Agriculture Operation Maps	6
6. Livestock Inventory	7
7. Livestock Location During Wildfire Season	7
8. Vehicles and Response Equipment/Resources	8
9. Water Sources	9

Part B: During a Wildfire	
14. Information Sources	
15. Decision Guide for Livestock Protection	16
16. Checklist for Sheltering Livestock in Barn	
17. Checklist for Moving Livestock to On-Site Outdoor Location	
18. Checklist for Relocating Livestock	19
19. Checklist for Opening Gates, Cutting Fences to Free Animals	
20. Checklist to Create a Fire Break	
21. Checklist to Deploy Sprinklers	
22. Checklist for Operating Backup Generator	
23. Checklist for Personal Evacuation	
24. Checklist for Visitor and Employee Evacuation	
Part C: After a Wildfire	27
25. Checklist for Damage Assessment	27
26. Checklist for Initiating Insurance or Other Loss Coverage	
27. Checklist for Recovery	
Part D: When Wildfire Plan is Complete	29
28. Finalizing, Storing and Sharing the Wildfire Plan	
Appendix 1: Farm / Ranch Wildfire Plan Summary	

Part A: Before a Wildfire

1. Wildfire Threat

Learn about the local wildfire threat (Provincial Strategic Threat Analysis and other publicly available mapping; and Alberta Wildfire Service information). <u>https://www.alberta.ca/wildfire-status</u>

Do you know who has jurisdiction over your area in the case of a wildfire (municipal or forestry)?

Is there a history of wildfires in the area and do you know what conditions tend to be predictors? (e.g., moisture and wind conditions)

		_
		Т
		I

Learn about general wildfire preparedness and how to determine the current fire danger rating in your area. Learn more at: <u>https://www.alberta.ca/wildfire-preparedness</u>

Learn how to make your farm/property more resilient towards the threat of wildfire. Learn more at: <u>https://firesmartalberta.ca/</u>

2. Agriculture Operation Information

Key information from your completed *Wildfire Plan* (indicated by a ♦) may be summarized in a separate *Wildfire Plan Summary* (see Appendix 1). This *Wildfire Plan Summary* may be used to initiate dialogue with key agencies (e.g. regional district, fire departments, Alberta Wildfire) in advance of the wildfire season and may assist in supporting identification and protection of your operation. The *Wildfire Plan Summary* may also be adapted for your use.

Key information about the Agriculture Operation includes the following:

Agriculture Operation name					
Land classification on Property Assessment Notice:					
◆ LINC Number *:	◆ Roll Number *:	Premises ID Number *			
♦ Agriculture Operation ph	nysical address (Legal Land	Description):			
Directions (nearest crossro	Directions (nearest crossroad):				
♦ Owner name(s):					
Owner mailing address (if different than above):					
◆ Landline tel. number: ◆ Mobile tel. number: ◆ Email address:					
 Lessee (leaseholder or renter) name(s): 					

*LINC Number - to access login create a guest account on https://alta.registries.gov.ab.ca/spinii/logon.aspx *Roll Number - find this number on your Property Assessment/Tax Notice

*Premises ID Number - login to your PID account https://partners.agric.gov.ab.ca/pid/ or contact 310-FARM

◆ Landline tel. number:	♦ Mobile tel. number:		♦Email Ad	ldress:	
◆Lessee mailing address (if different from above):					
♦ Number of individuals normally on the farm: Far			ly	Staff	Tenants
Other information:					

3. Grazing Lease Information

◆Lease Agreement Number:
Lease Location(s) (nearest crossroads, general location description):

[Skip to Section 4 if you do not have livestock on your property]

4. Emergency Contacts

Complete and revise the table below with information relevant to your operation and local area.

Name / Organization	Telephone	Driver / Vehicle Information
Agriculture Operation Personnel		·
Manager(s) (other than owner, identify local contact available to attend):		Vehicle License Plate Number: Driver's License Number:

5. Agriculture Operation Maps

The following maps support the Wildfire Plan for the agriculture operation. (Attach Maps to *Wildfire Plan Summary*)

6. Livestock Inventory

[Skip to Section 8 if you do not have livestock on your property. If you have pets that need to be considered in wildfire planning they may be listed below.]

Agriculture operations currently include the following animal types and numbers, with a range (i.e. minimum to maximum number of animals) shown for livestock numbers that vary throughout the year.

Livestock Type	Number on Agriculture Operation (min./max. number of animals if applicable)
Dairy, Lactating	
Dairy, Non-lactating	
Young Dairy Stock	
Bulls	
Cattle and type: Cow and Calf Heifer Steer Mixed	
Bison	
Horses, Donkeys	
Sheep	
Goats	
Swine	
Llamas and Alpacas	
Poultry	
Elk	
Other (e.g. mink, crickets, fish, etc.)	
Pets	

Refer to the <u>attached list</u> of animals by name, gender, and registration number.

7. Livestock Location During Wildfire Season

The location of livestock that are ranged both on-property and off-property on Crown range tenures will vary during wildfire season as follows:

O Expected livestock numbers by location during the early (May – June) and peak (July – September) fire seasons			
# of animals at the farm:		# of animals on Crown range	tenure
Early	Peak	Early	Peak
Cattle:		Cattle:	
Horses:		Horses:	
Other:		Other:	
Usual Turnout Date:		Usual Roundup Date:	

8. Vehicles and Response Equipment/Resources

The following vehicles and equipment are available for use during a wildfire:

Vehicle / Equipment Type	Number on Property (location)	Number Available Nearby (location)
0 Tractor, Front-End Loader or Backhoe		
0 Plow or Other Implements		
0 Livestock Trailer		
0 Utility Trailer		
0 Passenger Car		
0 Pickup Truck		
0 Fire Hose (m or ft)		
0 Portable Water Pump		
0 Sprinkler kit or other sprinklers (and roof ladders)		
0 Irrigation Sprinkler Gun		
0 Generator		

Sprinkler systems are available for purchase. One such provider can be found at the following link: https://shop.waspwildfire.ca/pages/gutter-mount-sprinkler-system

Vehicle / Equipment Type	Number on Property (location)	Number Available Nearby (location)
0 Fire Equipment (e.g., extinguishers, hand tools)		
0 First Aid Kit		
Personnel and certifications/training (S100 and other)		

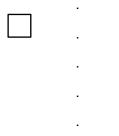

9. Water Sources

The following water sources are available for use during a wildfire. Consider vulnerability to power outages and potential restrictions during wildfire.

0 Water Source	0 Capacity	0 Powered (P) or Gravity Feed (GF) System	0 On Property or Nearby (location)

10. Structure Potential Risk

The following list includes structures present on the property of the agriculture operation (i.e. residential houses, feedlot, shop, barn, etc.). Prioritize areas in order of protection importance.

11. Hazardous Areas

The following list includes locations on the property that pose additional hazards threatens the agriculture operation (i.e. oil and gas well or riser locations, chemical storage, fuel storage, etc.).

12. Risk Reduction – On Property

10-1. Reduce Combustible Materials

The following list includes actions that should be taken before a wildfire threatens an agriculture operation.

1.	·	•
2.		•
		•

10-2. Use Fire Resistant Materials

The actions listed below should be taken to increase fire resistant construction for structures (sheds and barns, specialty buildings, outbuildings and fencing).

1.	
2.	
3.	·

10-3. Plan for Sprinkler Protection

A sprinkler system can be used to protect the agriculture operation, and should be established by taking the following steps. These systems make a significant difference for infrastructure protection. There are sprinkler systems available for purchase, one such provider is listed here: <u>https://shop.waspwildfire.ca/pages/gutter-mount-sprinkler-system</u>

1. Priority structures on the property to protect with sprinklers are as follows:

2. Sprinkler equipment that is available for prepositioning include:

- 3. Gather the equipment and set the sprinkler system in place to test the coverage and identify problems.
- 4. Mount the sprinklers in appropriate locations and connect to a water source. If the roof is made of combustible material, such as wood, direct the sprinkler spray onto the roof. If the roof is metal, mount the sprinklers on a high point (such as the ridge) to create a high humidity zone around the building. When sprinklers remain on the ground, position them so their reach just wets the sides of the structure.
- 5. Test the system for 2-3 hours, if possible. The sprinklers should create a humid environment around the structure without allowing water to enter buildings.

- 6. Secure the water source, protect it against radiant heat, and remove nearby combustible materials. Consider water supply vulnerability and install water storage (e.g. cisterns) if possible.
- 7. Create simple instructions on how to set up and activate the sprinkler system in the Wildfire Plan, section 21: *Checklist to Deploy Sprinklers*. Prepare a simple map showing how to lay out the sprinkler equipment and water delivery system in an emergency. Attach the map to the Wildfire Plan. The instructions and map will allow others to help with protection of the operation.

13. Risk Reduction – Range-Level Assets

[Skip to Section 12 if you do not have livestock on your property]

Priority-setting Guidelines

 Identify the range assets critical to day-to-day operations and keeping animals safe and on the range.
a
b
C
The following FireSmart actions (including fuel reduction) are required to reduce risk to these assets:
Asset a:
Asset b:
Asset c:

14. Insurance

Insurance coverage is an important step in managing risk before a wildfire event. Producers should ensure that they have appropriate coverage for their assets, such as livestock, crops (both in-progress crops and completed stock), buildings, equipment, and fences. In general, federal and provincial disaster management programs will only cover perils for which private coverage cannot be obtained. In addition to private commercial insurance, a suite of government supported risk management programs including crop production insurance are available to agriculture producers. 1. I meet with my insurance agent or broker or government program representative at least annually to review my coverage.

2.	I understand m	y policy a	nd am aware	of what is include	d and what is excluded.
----	----------------	------------	-------------	--------------------	-------------------------

3. My essential insurance information is recorded and available in event of wildfire emergency. Include private commercial insurance (e.g., farm, livestock, crop, business interruption) and government supported production insurance or other business risk management program you subscribe to.

4. I have photographs of the property and assets in their current state and condition taken annually from the same location/position and they are filed in a secure location (i.e., with insurance documents).

Record the essential information on commercial farm insurance in the spaces below.

Policy Number	
Date of Purchase / Last Renewal	
Insurance Provider	
Agent Name, Organization	
Telephone Number, 24/7 Claims	
Key Coverages and Exclusions	•
	•
	•

Record the essential information on additional commercial insurance and/or government supported insurance or business risk management program in the spaces below. Add another page as/if required.

Policy Number	
Date of Purchase / Last Renewal	
Insurance Provider	
Agent Name, Organization	
Telephone Number, 24/7 Claims	
Key Coverages and Exclusions	•

15. Backup Power

Some actions may be required before a wildfire to ensure backup power supply can keep critical equipment working in a prolonged power outage.

Note: Protect yourself and the community around you by ensuring that any generator backup systems are properly installed to ensure no feedback into the power grid. Electrical systems must be wired to exclude regular electric power.

- 1. Identify the critical agriculture operations that depend on electrical power by priority.
 - a. _____. b. _____
 - С. _____

- 2. Gather or acquire the power equipment needed to provide backup power, including electrical cords, fuel, lubrication, and filters for generators.
- 3. Set the backup generators in place and connect them to the critical equipment that requires power. Confirm that the generator is disconnected from the power grid, to avoid back-feed.
- 4. Start the generator(s) to test the system for at least 1 hour, if possible. Confirm that the power loads are sufficient to operate the priority equipment. Note the fuel use rate and estimate how long a system can provide power without service or refueling.
- 5. Create instructions on how to set up the backup power system in section 22 of the Workbook, *Checklist for Operating Backup Generator*. Prepare a diagram to show how and where the equipment should be laid out and connected in an emergency. Attach the map to the Wildfire Plan.

Part B: During a Wildfire

16. Information Sources

- 1. Learn about the wildfire situation. Note that data-based services such as text messaging, social media or email are less likely to experience major interruptions when phone lines are down.
- 2. Complete and revise the table below with information relevant to your local area.

Record the local radio news media stations for your operating area in the space below. Review and confirm official information sources annually.

Regional District	**add local resources below**

2. Learn about the evacuation status. There are three phases of an evacuation:

Evacuation Alert – A warning is issued about an imminent threat to life and property. Moving livestock to safety is encouraged during the Evacuation Alert phase when time is available. People are asked to be ready to leave on short notice. This is also a good time to move children and the elderly to safety.

Evacuation Order – During an Evacuation Order, the local police of jurisdiction may strictly enforce traffic flows that move residents to safety.

Evacuation Rescind – An Evacuation Order is rescinded when it is determined to be safe for residents and livestock to return home.

The RCMP is responsible for implementing evacuation notification. They may use a variety of local resources to notify people of an evacuation.

17. Decision Guide for Livestock Protection

[Skip to Section 20 if you do not have livestock on your property]

The agriculture operation is prepared for the following response actions. Different animals may require unique response actions, depending on the situation, to achieve the lowest overall risk.

CHECK THE APPROPRIATE OPTIONS AT THE TIME OF A WILDFIRE EMERGENCY.

Option 1: Shelter livestock in barn. (see section 16)

Shelter-in-place is best for (*fill in type of animal*)______because:

- There is a barn on the farm where the animals will be safely removed from the danger (i.e., barn is protected by sprinklers).
- It would require the least amount of time.

Moving animals to an outdoor location (or alternate location on the range tenure) is best for (*fill in type of animal*)______because:

- There is a pasture on the range tenure where the animals will be safely removed from the danger (i.e., large field with food and water).
- We have sufficient time, personnel, and equipment to round up and moveour animals to this area.

Option 3: Relocate livestock off site. (see section 18)

Relocating the (*fill in type of animal*)______is the best option because:

- We have located and prearranged an off-site relocation site.
- We can gather the animals into a safe location to be evacuated.
- We have or can arrange for trucks, trailers, drivers, and handlers, if necessary.
- We can arrange for feed, water, and veterinary care at the relocation site.

Option 4: Open gates and/or cut fences to free the animals IF SAFE TO DO SO. (see section 19)

Freeing the (*fill in type of animal*)_____is only considered if:

- Livestock cannot be moved to a safer area.
- There is no danger to people or vehicular traffic from freeing the animals.
- We have the time and personnel to open gates and/or cut fences to allow the animals to avoid the wildfire.
- We will inform the local authority or Evacuation Notification Team (usually led by RCMP) of our decision to free the livestock.

Refer to the following checklists (checklists in sections 16 - 19 of the Workbook) for instructions on each appropriate action.

18. Checklist for Sheltering Livestock in Barn

The following steps should be taken if sheltering livestock in barn is selected.

1. Ensure there is sufficient time, personnel, and equipment to move livestock to a
protected barn. Ask family members, neighbors, and others for help.

2. Move animals to one or more protected barns or other structures on the farm where the animals will be safe. A <u>protected structure</u> is one where:

- Combustible materials have been removed around the structure
- Fire resistant materials have been used in its construction
- Sprinklers can offer protection from forest fire hazards
- Water pumps for the sprinkler system have backup power

3. Ensure animals have access to food sources, clean water, and ample living space, and that support systems are connected to backup power. These systems should be able to support the operation for 72 h.

19. Checklist for Moving Livestock to On-Site Outdoor Location

The following steps should be taken if moving animals to an outdoor location is selected.

1. Ens	ure there is sufficient time, personnel, and equipment to move livestock to a
saf	fe outdoor location on-site such as a pasture or other irrigated or heavily-grazed
ope	en area.

-	-	-	-	-	

- 2. Move livestock to one or more open areas on the site where the animals will be safely away from the hazard. A <u>safe outdoor area</u> is one where:
 - The field has been recently irrigated
 - Fire breaks have been constructed
 - The field has been heavily grazed
 - Fencing is in place
- Ensure animals have access to food sources, clean water, and ample living space. These systems should be able to support the operation for 72 h.

20. Checklist for Relocating Livestock

Consider the actions below for relocating livestock during a wildfire emergency. <u>Livestock</u> <u>should, as much as possible, not be moved during an Evacuation Order to keep roads clear for</u> <u>people</u>. RCMP will only allow livestock movement if it does not interfere with the movement of people.

1. If time is short, the priority animals for livestock relocation off-site are:

Type of Livestock:	Number:

2. Notify the primary site selected for receiving relocated livestock (consider a mutual aid agreement or memorandum of understanding).

- Name:______.
- Phone number: ______.
- Email address:
- 3. Ensure all relocated animals have farm/owner identification, including just-in-time methods, for example paint on hooves, collaring, etc.
- 4. Ensure all biosecurity and disease control requirements for relocating your animals to the selected site are met, including documentation of required vaccinations.
- 5. Consult the Evacuation Notification Team (usually led by RCMP) or Regional District / Municipal EOC to determine routes that are safe to use. Record primary and alternate routes below.
 - Livestock pick-up location on site:

6.	Identify livestock haulers. • Hauler name:
	Hauler phone number:
	Email address:
7.	Identify any special challenges with assembling and loading your animals

During emergencies, the primary responsibility for livestock protection lies with the individual producer and if they have the ability to relocate livestock themselves, they are encouraged to do so.

If a producer needs assistance with transporting farm business livestock during an Evacuation Alert (or Order if conditions permit), the local government that has issued the alert may be able to help. Funding assistance may be available. Contact the local Emergency Operations Call Centre and Ministry of Agriculture for current policy and procedures and any event-specific supports that may be available.

21. Checklist for Opening Gates, Cutting Fences to Free Animals

If animals are to be freed, consider the steps outlined below.

 Carefully consider the risk to motorists on nearby roadways and other persons who may be harmed by freeing animals. It is possible to open fences in a way that directs animals away from roadways and populated areas. Note: Protecting livestock is important, but public safety takes precedence.

- 2. Ensure all relocated animals have farm/owner identification, including just-in-time methods, for example paint on hooves, collaring, etc.
- 3. Open the gates indicated on the Agriculture Operation Map, especially noting:
 - a. ______ b. _____ c. _____

4. C	ut or open fences at the following locations to allow animals to avoid fire:
a.	<u>.</u>
b.	<u>.</u>
C.	
5. No	tify the Evacuation Notification Team (usually led by RCMP) of the decision to

free the livestock when evacuating.

22. Checklist to Create a Fire Break

If time allows for creation of a fire break to protect agriculture operation structures, follow the instructions below.

1.	The priorities for plowed or wetted fire breaks to protect structures are:
	a
	b
	С
2.	Consult the map showing which areas should be plowed or wetted down to create fire breaks.

23. Checklist to Deploy Sprinklers

If sprinklers are to be used to protect structures, follow the instructions below.

1. The priorities for deploying sprinklers to protect structures are:
a
b
C
Consult the map showing how to lay out the sprinkler equipment and water delivery system.

- 3. Secure the water source, protect it against radiant heat, and remove nearby combustible materials.
- 4. Activate pre-positioned irrigation systems and sprinklers on the property to help protect structures.

Note: The Office of the Fire Commissioner recommends a wetting time of two hours prior to fire reaching the property for full saturation and effectiveness. **Sprinklers should not be turned on until necessary to conserve water for fire suppression.** Check with the local water authority regarding potential water use restrictions for sprinklers.

24. Checklist for Operating Backup Generator

When electrical equipment needs backup support, follow the steps below.

1. T	1. The priorities for providing equipment with backup generator are:			
a.				
b.				
C.				
d.				

- 2. Consult the instructions and map showing how to set out the generator and connections.
 - 3. Ensure there is enough fuel to operate the generator for 3 days.
 - 4. Secure the generator and fuel; protect them from radiant heat from possible fire sources. Remove nearby combustible materials.
 - 5. Ensure backup generator systems utilize an automatic switch that turns off regular electric power when the generator system is on.

25. Checklist for Personal Evacuation

- 1. In addition to a Grab 'n Go Kit (a collection of essential personal items see below), take the following items when evacuating:
 - a. Identification that includes a photo and address, such as a driver's licence. This will help producers obtain a permit if they are allowed to temporarily return to the agriculture operation to attend to essential services, including care for livestock and essential crop management.
 - b. Premise ID Number, if applicable.
 - c. A copy of the *Wildfire Plan*, including the livestock inventory and any other appended or accessory information.
 - d. Operation/farm related items
 - o Critical business documentation, building keys
 - Employee records
 - o Tools and equipment for livestock handling, transport, care
- 2. Evacuate all personnel.
 - If an Evacuation Order is issued, ensure all personnel move to safety.
 - Family and staff can check with others by texting or emailing:

3. I have assembled a Grab 'n Go Kit and know its location. (see below)

Suggested Personal Grab 'n Go Kit

(Personalize for your needs & keep with you at all times)

For more information see: <u>https://www.alberta.ca/farm-animals-and-livestock-preparedness.aspx</u>

- Bottled water
- Nutritious foods (dried fruits, granola bars, nuts, or beef jerky)
- Personal medications
- Personal toiletries
- Dust masks and gloves
- Family photos (recent)
- Personal papers (copies of insurance, emergency contacts, prescriptions & identification)
- Flashlight

- Radio
- Whistle
- Pocket knife
- Emergency blanket and garbage bags
- Extra pair of eye glasses
- Extra money, coins, phone cards
- Book and / or game

Suggested Car Kit

(At the beginning of wildfire season prepare your car kit and store it in your vehicle. Keep up car maintenance and fuel so you don't run out.)

- Bottled water
- Nutritious foods (dried fruits, granola bars, nuts, or beef jerky)
- Manual can opener
- Comfortable, sturdy walking shoes
- Warm blanket
- Heavy-duty work gloves (leather)
- Dust masks and gloves
- Change of clothing
- Road map & compass
- Duct tape and garbage bags

- First aid kit & manual
- Fire extinguisher
- Flashlight (+ extra batteries)
- Flares, candles w/matches & jar
- Ziplock bags, toilet tissue
- Hardhat
- Large, sturdy backpack
- Small tool kit
- Booster cables
- Deck of cards, good book

26. Checklist for Visitor and Employee Evacuation

[Skip to Part C if you do not receive significant numbers of visitors or do not have employees on your property that would be at risk during the wildfire season]

Before an Evacuation

1. Roles and Responsibilities for implementing the evacuation plan are identified below. Contact information for designated individuals is included in *Section 4 – Emergency Contacts.*

Individual Name	Role	Responsibility
	Primary Decision Maker / Coordinator:	
	Back-up Decision Maker / Coordinator:	
	Other:	

2. The following **Communications Plan** outlines how communications should occur with the individuals or groups listed during a wildfire emergency.

Who to Communicate With	What to Communicate (and How)	Responsibility
Employees	Wildfire / evacuation status and procedures (e.g., meetings / verbal updates, plan review and discussion, evacuation plan copy and training provided at orientation)	
Visitors	 Wildfire/ evacuation status and Public Safety Announcements as/if available (e.g., posted on site and on website) Evacuation procedures (e.g., verbal directions, information, instructions, bulletins, evacuation 	
Local Government Emergency Operations	 map posted on site) Evacuation status (monitor website minimum on a daily basis, receive email or social media notifications as/if available) Seek information and guidance as/if required in support of decision making in advance of an evacuation order – during alert stage (e.g., direct communication with emergency operations as/if available) 	
Alberta Wildfire	Wildfire status, evacuation status, (monitor website minimum on a daily basis, receive social media updates)	
Other		

3. **Routes and Exits** from our operation, including all buildings and business sites where visitors and employees may be located at any given time have been identified and are indicated on an **evacuation map** (see map in section *5*). Any special procedures required to ensure exit is unconstrained are identified.

Site or Building	Route / Exit	Special Procedures		

- 4. Our post-evacuation assembly area as indicated on the evacuation map (see map in *Section 5*) is as follows:
- 5. Our system for accounting for personnel and visitors includes the following procedures (include a final property sweep):

6. Emergency shut-off procedures for utilities, equipment and processes are confirmed. The following must be shut-off prior to evacuating:

Equipment (*specify*):

Processes (*specify*):

Other (specify):

Procedures for assisting visitors and employees with disabilities or mobility issues a follows:					
. Employees are aware of the evacuation procedures and routes and these can be effectively communicated to visitors during an evacuation. Annual or periodic mock					
evacuations are recommended to test your system and train employees					

During an Evacuation

- 1. Follow instructions provided by emergency officials.
- 2. Complete emergency shut-off procedures for utilities, equipment, and processes.
- 3. Take your individual Grab 'n Go Kits and critical business paperwork.
- 4. Assist individuals with mobility issues or disabilities.
- 5. Account for personnel and visitors after evacuating.

After Evacuation

Once the Evacuation Order is rescinded emergency officials (local government or Province) will advise when it is safe to return and if there are any special considerations to ensure the safety of visitors and staff at your operation.

Part C: After a Wildfire

27. Checklist for Damage Assessment

Once the evacuation order has been lifted and if damage is observed on the agriculture operation, consider these steps to limit further damage.

1. Check livestock that sheltered-in-place at the earliest possible opportunity, ensure safety and provide for their needs with water, feed, etc.

2. Inspect the agriculture operation for hazards and damage. Take care to avoid hazards, such as smoldering tree roots underground.

3. Contact insurance agent or broker (refer to the Guide section 12, Insurance Information and section 26, Initiating Insurance of Other Loss Coverage below).

4. Document any loss of livestock, buildings, fences, or equipment in writing, using
the inventory to verify losses. Document salvaged items.

5. Take samples as required for laboratory assessment of damage to honey
horticultural crops and garden produce.

6. Take photographs and video of any damage following a disaster to document the loss (ideally before and after taking any recovery action). Take photographs from the same location/position as your pre-event baseline photographs.

7. Secure the site.

28. Checklist for Initiating Insurance or Other Loss Coverage

- 1. Review insurance policy with the insurance agent or broker and report the damage/loss.
- 2. Review any government supported risk management program you have paid into or subscribed to with the government agent and report the damage/loss.
- 3. Assemble all required supporting documentation and complete and submit claims for losses.

29. Checklist for Recovery

The following steps should be taken to continue the disaster recovery process.

- 1. Work with neighbours to locate and identify loose animals in the area, and to return livestock that escaped or were treed.
- 2. Seek assistance from agriculture associations active in your area (refer to the Contact List in *Section 4*), and from the Regional Districts.
- 3. Work with neighbours to get the agriculture operation and the community operational as soon as possible.
- 4. Attend community recovery information sessions to find out about provincial measures that may assist the agriculture operation with disaster recovery.
- 5. If eligible, apply for Provincial Disaster Financial Assistance through the Alberta Disaster Recovery Program Website: https://www.alberta.ca/disaster-assistance-and-recovery-support.aspx
